Production Optics Division (*Trial*)

The IPSC General Assembly held on August 26, 2017 in Chateauroux, France – saw the introduction of a trial of a potential new division known as Production Optics. The IPSC Executive has endorsed the Regions to trial the new division, however there was no clear definition as to the rules covering the trial.

Subsequently, at the IPSC Australia Annual General Meeting held in October, it was decided to proceed with the attached rules for Production Optics during the three year trial period.

Basically the rules are the same as they are for the current Production Division (other than the introduction of slide mounted *red dot* scopes). There is to be no milling or adjustment to the existing factory slide permitted.

Effective immediately; IPSC Australia will be applying the attached rules for Production Optics. We actively encourage all IPSC Australia Sections and Clubs to support and offer this trial division.

Please note that there is a preferred method of reporting when offering Production Optics:

- Level III matches - when using WinMSS run a separate match and score Production Optics only in Open.
- Level I and II matches using PractiScore or similar where new divisions can be added, set up Production Optics as its own division.
- Level I and II matches when using WinMSS tag Production Optics competitors in Open if all other Divisions are in use/attended. If not used/attended Production Optics can be scored in the non-utilised Division.

The second two are not the preferred options but can be used for Level I and II matches only.

At present no President Medals will be awarded during this trial period for Production Optics, however we encourage all Sections to support the trial and provide local/Section medals.

We hope that this new division will offer a popular option to competitors and with luck, be popular enough to grow like our other divisions.

Regards

GARETH GRAHAM
Regional Director

25 October 2017

APPENDIX D6: Production Optics Division (*Trial*)

| | | |
|-----|--|---------------------------------|
| 1. | Minimum power factor for Major | Not applicable |
| 2. | Minimum power factor for Minor | 125 |
| 3. | Minimum bullet weight | No |
| 4. | Minimum bullet caliber / cartridge case length | 9 mm (0.354") / 19 mm (0.748") |
| 5. | Minimum bullet caliber for Major | Not applicable |
| 6. | Minimum trigger pull (see Appendix E4a) | 2.27 kg (5 lbs.) for first shot |
| 7. | Maximum handgun size | Maximum barrel length 127 mm |
| 8. | Maximum magazine length | No |
| 9. | Maximum ammunition capacity | Yes, see below |
| 10. | Max. distance of handgun and allied equipment from torso | 50 mm (see Rule 5.2.5) |
| 11. | Rule 5.2.10 / Appendix E2 applies | Yes |
| 12. | Optical/electronic sights | Yes, see below |
| 13. | Compensators, ports, sound and/or flash suppressors | No |

Special conditions:

14. Only handguns listed as approved on the IPSC website may be used in Production Optics Division. Note that handguns deemed by IPSC to be single-action-only are expressly prohibited. The official IPSC protocol used to measure barrel length is described in Appendix E4b.
15. Handguns with external hammers must be fully decocked (see Rule 8.1.2.5), at the Start Signal. First shot attempted must be double action. Competitors in this Division who, after the issuance of the Start Signal and prior to attempting the first shot, cock the hammer on a handgun which has a loaded chamber, will incur one procedural penalty per occurrence. Note that a procedural penalty will not be assessed in respect of courses of fire where the ready condition requires the competitor to prepare the handgun with an empty chamber. In these cases, the competitor may fire the first shot single action.
16. Original parts and components offered by the OFM as standard equipment, or as an option, for a specific model handgun on the IPSC approved handgun list are permitted, subject to the following:
 - 16.1 Modifications to them, other than minor detailing (the removal of burrs and/or adjustments unavoidably required in order to fit replacement OFM parts or components), are prohibited. Other prohibited modifications include those which facilitate faster reloading (e.g. racking or charging handles, flared, enlarged and/or add-on magwells, etc.), changing the original color and/or finish of a handgun, and/or adding stripes, stippling or other embellishments.
 - 16.2 Magazines accessible to a competitor during a COF must not contain more than 15 rounds at the Start Signal. Identifying marks or decals, internal capacity limiters, bumper pads and additional witness holes, which add or remove negligible weight to/from magazines, are permitted.
 - 16.3 Sights may be trimmed, adjusted and/or have colors applied. Sights may also be fitted with fiber optic or similar inserts.
17. Aftermarket parts, components and accessories are prohibited, except as follows:
 - 17.1 Aftermarket magazines are permitted, subject to 16.2 above.
 - 17.2 Aftermarket open sights (~~see Rule 5.1.3.1~~) and mounting plates are permitted, provided their installation and/or adjustment requires no alteration to the handgun.
 - 17.3 Aftermarket grip panels which match the profile and contours of the OFM standard or optional grip panels for the approved handgun and/or the application of tape on grips (see Appendix E3a) are permitted. However, rubber sleeves are prohibited.
18. Optical sights must be mounted to existing sight fitting points installed on the upper rear of the slide by the OFM (i.e. dovetails or dedicated optical sight mounting points only). Racking or charging handles or other similar protuberances cannot form part of the optical sight or its mounting.
19. This division will expire on 31 December 2020 unless previously extended.
